Pre-Spot

www.mftnational.com

Description

Pre-Spot is a leading-edge spot cleaner that quickly and safely removes a wide spectrum of stains from carpet.

Pre-Spot is an integral part of the MFT Carpet Maintenance Program and is Ecologo certified.

Our "Ready To Use" (RTU) formulation is designed to work seamlessly with MFT's Pre-Cap and Encap-Tech products.

Before Treating

Pre-Test Carpet For Colour Fastness

- Remove any accumulation of dry stain material from the carpet.
- Choose an inconspicuous piece of carpet, spray Pre-Spot on to a white terry cloth and press the cloth onto the carpet.
- If any colour transfers from the carpet to the terry cloth, cease using the product immediately.

Stain Removal Process

- Spray Pre-Spot on to a clean white terry cloth until the cloth is damp but not dripping wet.
- Press the terry cloth on the stain, repeatedly blotting the area, for 10 seconds to two minutes or until the stain has been removed.
- Stain removal success is enhanced using a tamping brush.
- Lift the terry cloth and lightly rub the stain from the outside edges of the stain into the centre.
- Repeat the process until the spot is removed.
- Do not aggressively rub the carpet or apply Pre-Spot directly to the carpet.
